

Connecting NFT Assets To Any **Metaverse**

Team With Expertises in Crypto, DeFi & NFT

Pisuth Daengthongdee (Ohm)
Team Lead

- Based in Japan (Unders JP's startup visa program)
- ConsenSys Accelerator Alumni, NY
- Chainlink Ambassador Japan
- Ex-Binance Launchpad Project (Perlin)

Pongsatorn Jiranun (Moo)
Engineer

- Tsinghua University, China
- 6+ yrs. tech experience in China
- 1+ yr in crypto/blockchain
- Multi-languages expert

Kantapat Chankasem (Gang)
Engineer

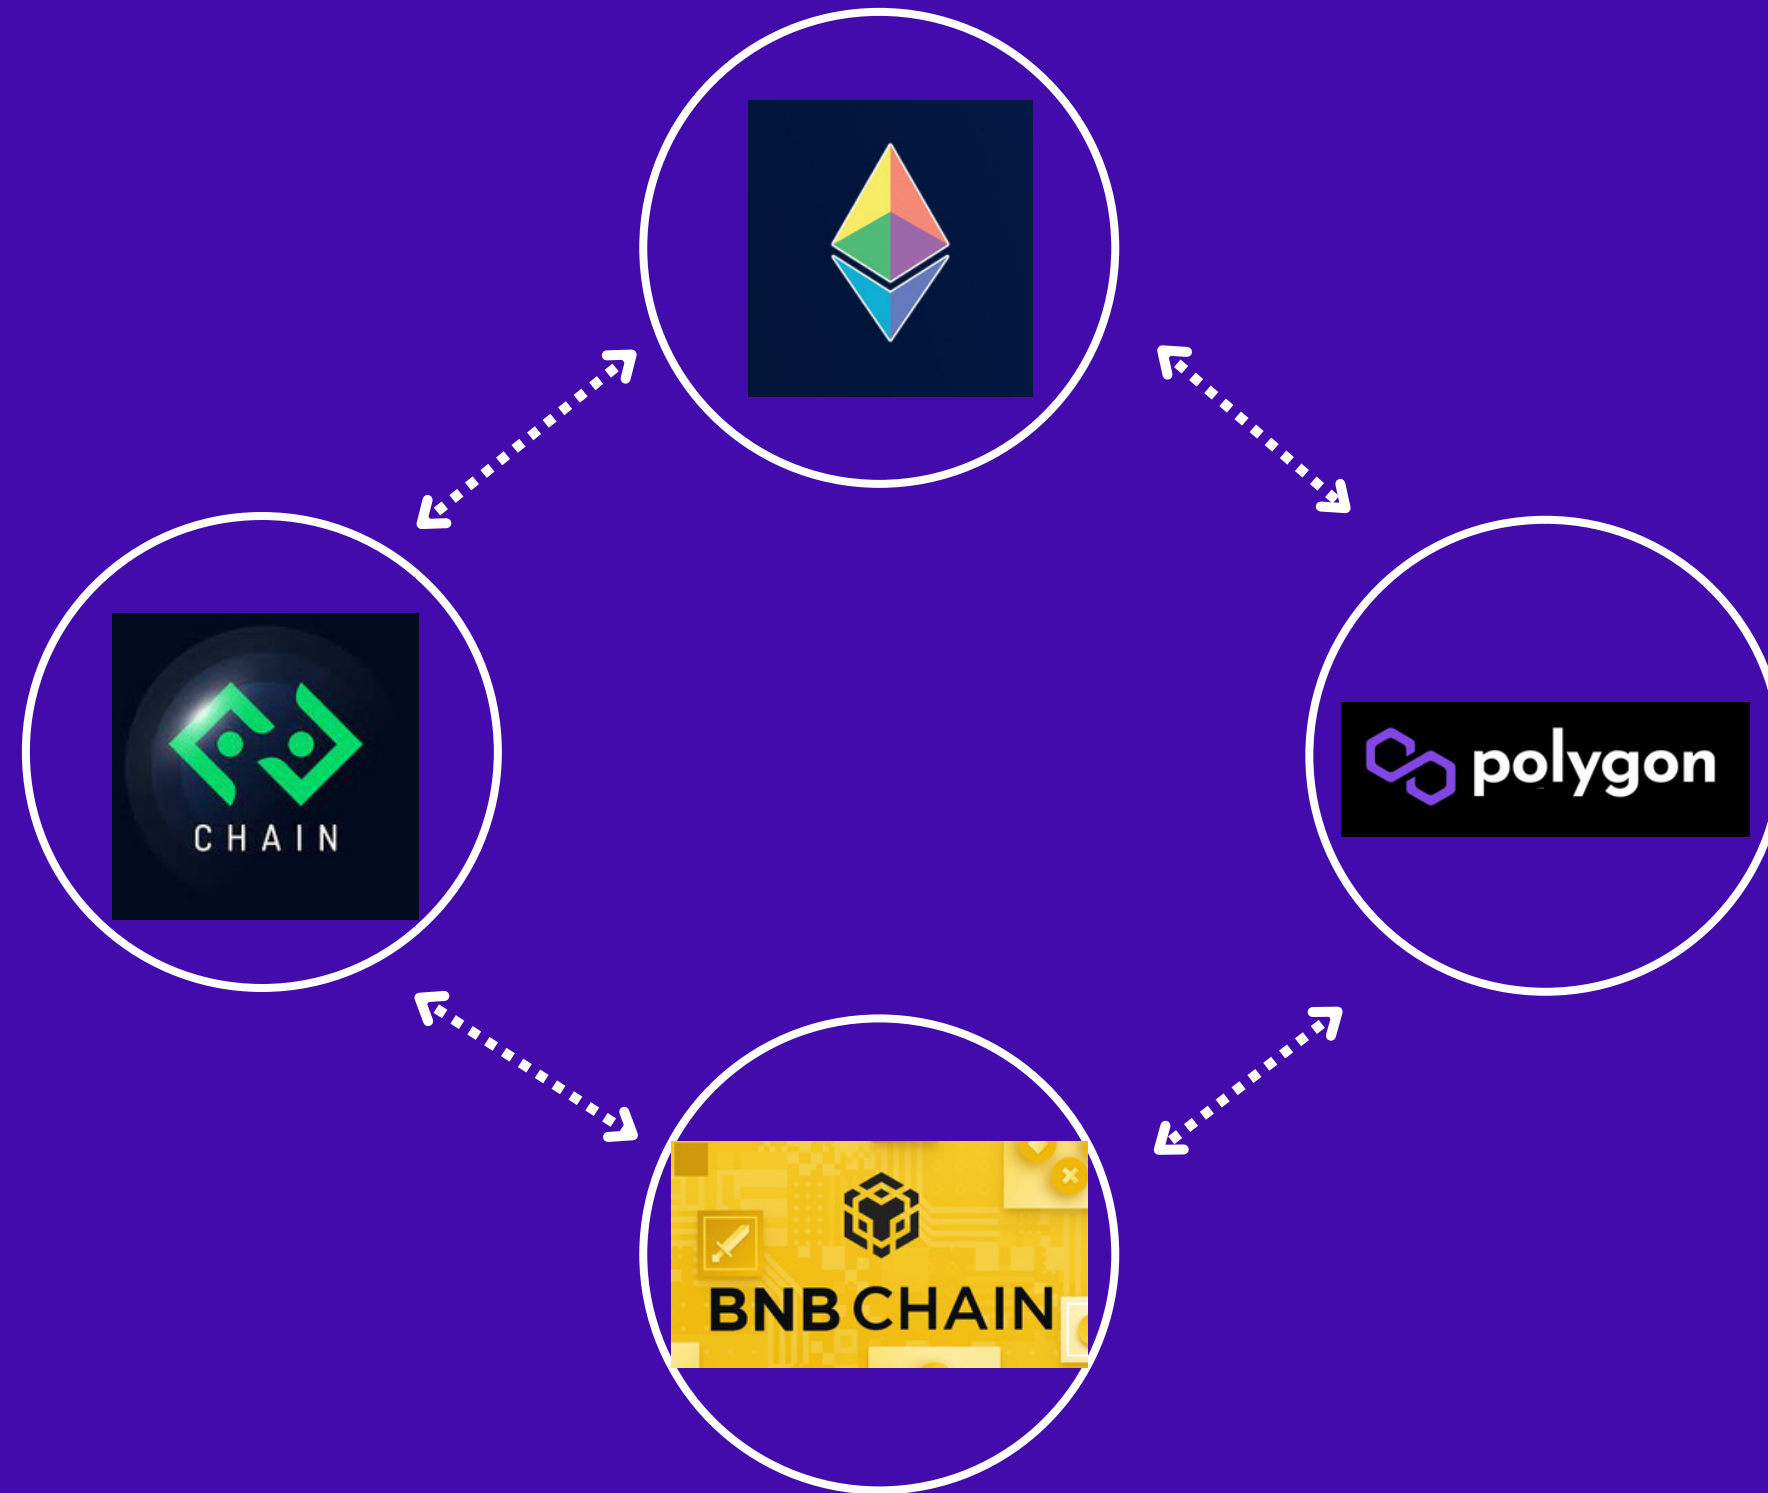

- Chulalongkorn University
- Chulalongkorn Blockchain Club
- 4+ years in crypto/blockchain
- Chainlink, ETHGlobal hackathon winners

An all-engineers team with
experience from

Current Problem

Metaverse is
Multi-chain

But Your
Fund is **Not**

Multi-chain Trade is Impossible Today

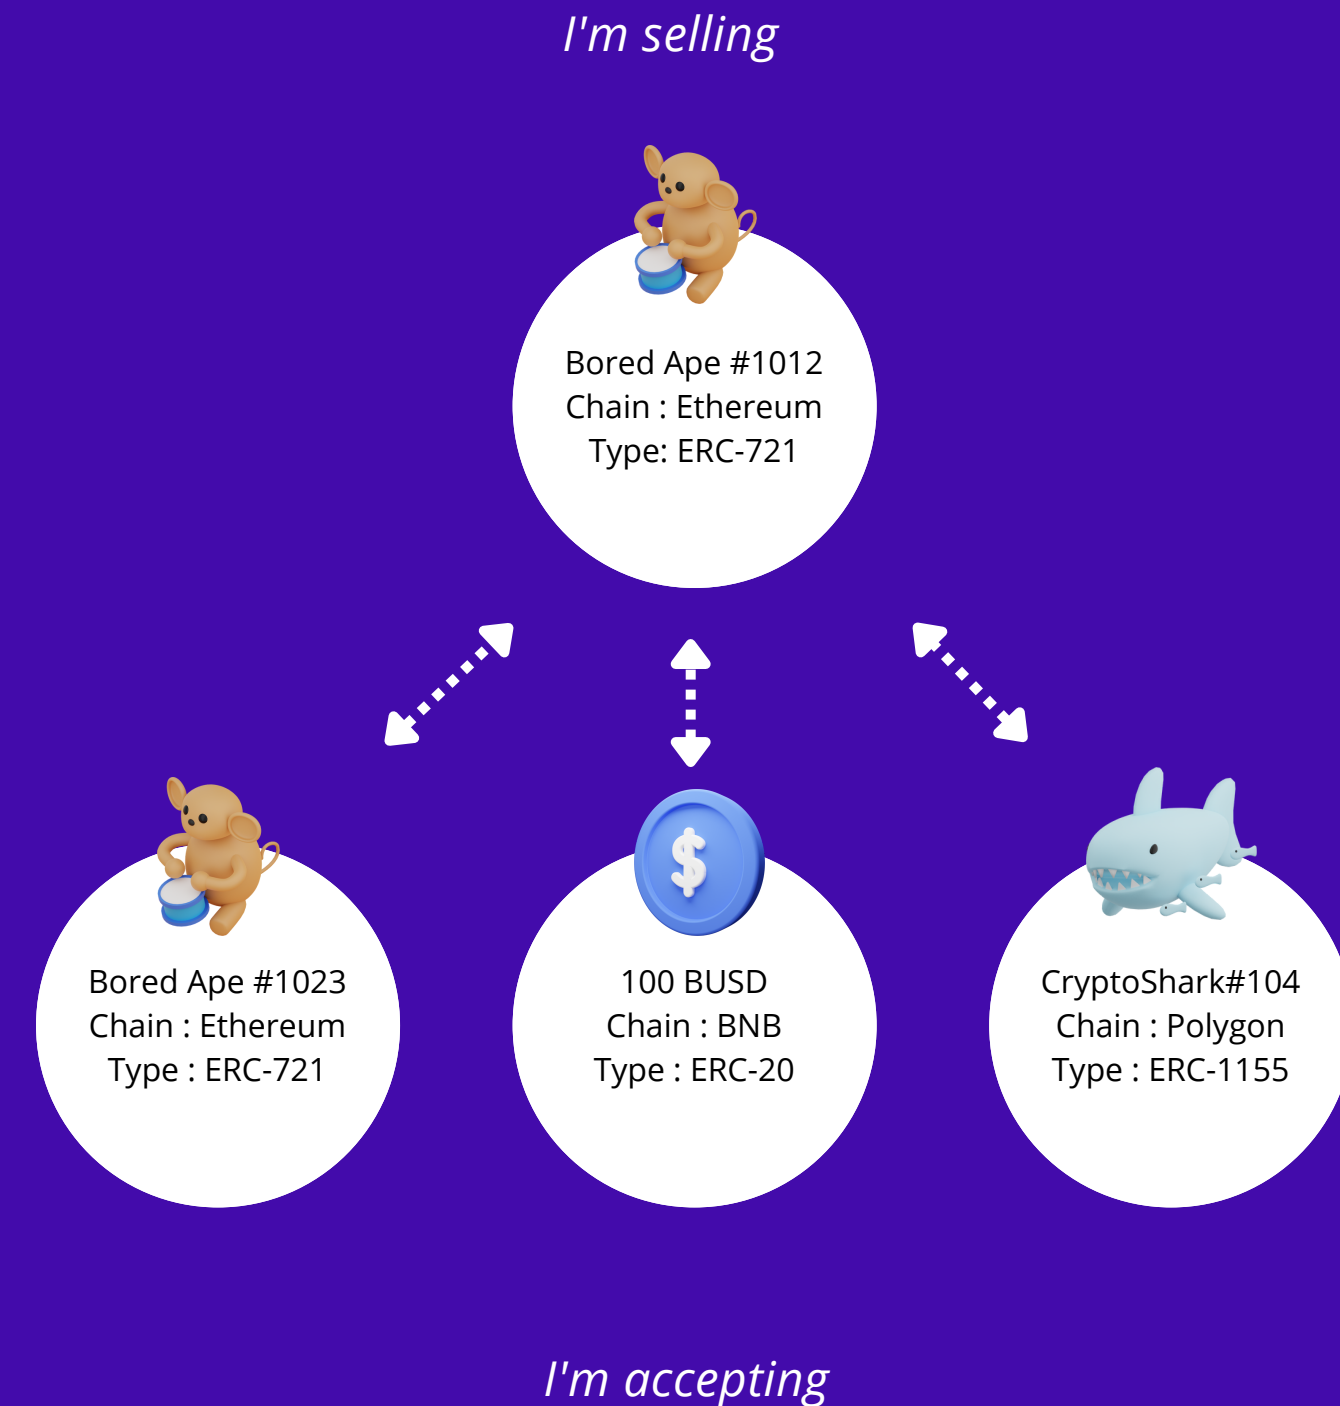

BUY	SELL
Bridge Your Fund (20-40 mins.)	Bridge Your NFT (20-40 mins.)
Buy or Bid Auctions (2-3 mins. to days)	List Your Replicated NFT to Marketplace (2-3 hrs.)
Receive Your NFT (*20-40 mins.)	Receive Your Fund (*20-40 mins.)

It takes approximately hours to days to trade one-to-one while one-to-multi is **practically impossible** and **the cross-chain bridge** is a major target for hacking (\$612 mil. from Ronin alone)

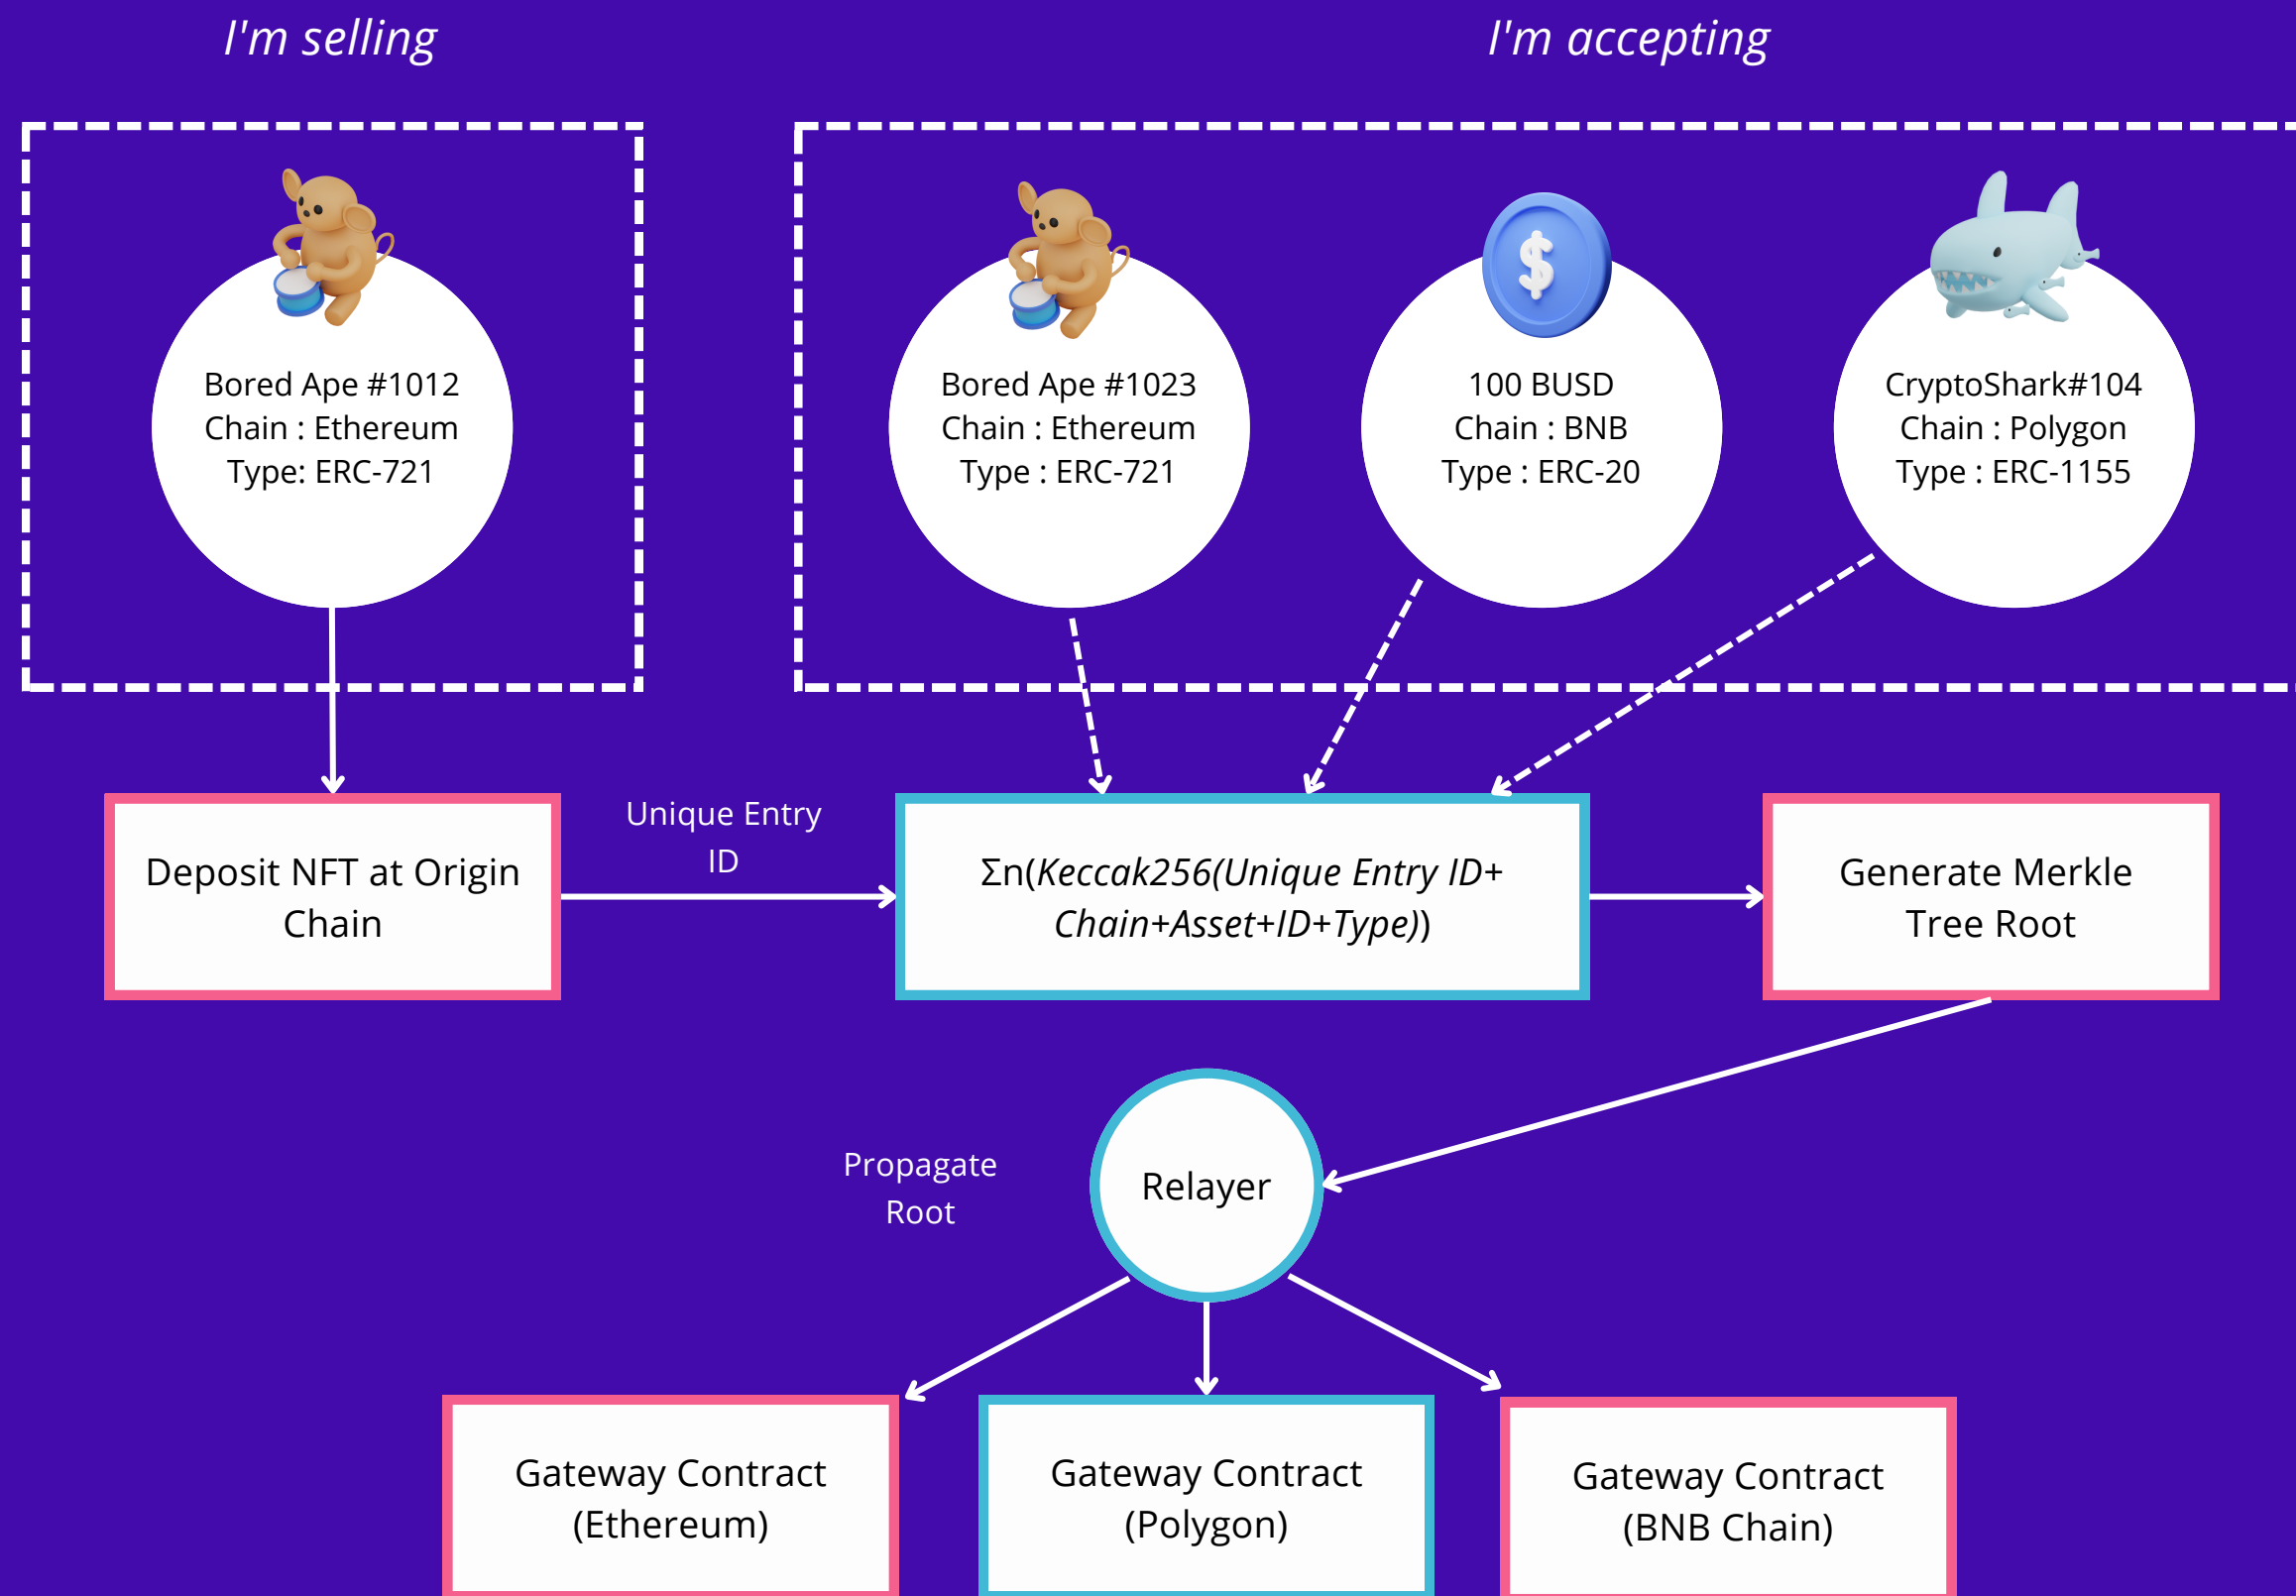

Tamago Multi-chain Solution

Tamago multi-chain marketplace is a P2P trading protocol for NFT assets to be swapped across blockchain networks

- List once and sell everywhere
- Unlimited no. of assets to be accepted
- Low settlement time

How It Works

Differentiation

TAMAGO	OTHERS
ONE-TO-MANY CHAINS TRADING	ONLY ONE-TO-ONE CHAIN TRADING
DO NOT MINT ANY REPLICATED ON ANY CHAIN	MINT REPLICATED NFT AT DESTINATION CHAIN
SIMPLE AND LESS STEPS GIVEN TO THE USER	COMPLEX AND SOPHISTICATED FOR THE USER
ATOMIC AND DECENTRALIZED	MORE PRONE TO HACK ATTACKS

Demo Times!
